

### 'Art vs Algorithm'

X, JULY 22, 2025: <sup>By a staff reporter</sup> The most wonderful invention of <sup>the</sup> 21st century's ~~world~~ is artificial intelligence. Human beings <sup>have</sup> ~~has~~ <sup>their</sup> own power of thinking and intelligence. But when we perform our works with the aid of <sup>a</sup> computer, it is called artificial intelligence. A.I is widely used in many spheres of our <sup>lives</sup>. It provides numerous benefits <sup>by</sup> reducing human errors and <sup>ing</sup> increases efficiency. Again its time saving feature is highly useful in many sectors. Non-stop service of A.I is very much fruitful in the field of medical as well as banking, security, industry etc. In the field of education, it <sup>also</sup> plays a pivotal role <sup>also</sup>. In ~~the~~ <sup>ies</sup> industry more products are produced saving human labour. Actually A.I paves the way of a new possibility.

On the otherhand art is the spontaneous overflow of human thoughts. A.I has a multifaceted impact on the creative sector. A.I algorithms are being trained to mimic the styles of the artists <sup>and</sup> painters. Music production and literature ~~are~~ <sup>have</sup> also <sup>been</sup> changed <sup>by this</sup> A.I. The notion of collective intelligence where A.I and human creativity combine suggests a future where creative expression becomes more inclusive and diversified.
